Notes

- Rules: <https://www.pittsburghshootout.com/rules>
- Handbook: [Handbook \(pittsburghshootout.com\)](https://www.pittsburghshootout.com/handbook)
- Maps:

Showers and restrooms are circled in **RED** on the above images.
 Parking is in the 4C lot marked **PURPLE** or at your camping area.
 Camping area is marked in **GREEN**.
 Do not park on the grass except in the green camping area.
 Please avoid parking in 4B or 5B/C on Saturday.
 Do not park on the South Paddock (B) driveway. It must be kept clear for emergency services.

1. You'll be receiving a Stripe invoice in the next few days with a payment link (waitlisted teams, you'll get it when you move). The link expires after a certain amount of time, but you can click a button to regenerate the link. Payment is due by **August 2**, and I cannot guarantee refunds after July 2.
2. Camping is still free on site both Friday and Saturday. You'll recall last year we had an issue at the track where the students were forced to leave the site. As such, there will be extra security at the track overnight (around the paddocks generally) and campers must be wearing identifying wristbands. Please make your team aware of this, and let me know by **July 2** if your team plans on camping. In August, I will need a specific headcount to make sure we have enough wristbands. A roster may need to be provided, I haven't decided yet. This is a lot of extra work on our end so I'm trying to avoid it. Please don't do crimes this year.
3. Due to contract changes with the track we cannot bring our own food truck this year, so I'd recommend making other plans. There will be a BBQ food truck on site, but not at the Shootout directly. I'm trying to get a sponsorship of coupons for the local Sheetz for students to go get food at a reduced cost, and ANSYS has donated a pallet of water and Gatorade.
4. We plan on requiring an accumulator pre-inspection video alongside FSAE.
5. Vehicles which are competing at the Shootout but have not competed at FSAE/FH will be asked to provide an SES, ESF, ETC FMEA etc by **July 2**. Please let me know if your team is in this situation.
6. We will be splitting the classes as 1/3 of the registrations are EV. FH cars will compete in EV.
7. Skidpad will be out of 75pts and Autocross 125pts. Both events will run all day with a 1hr break for lunch.

To do:

Michelin planning 2023

Monday, July 10, 2023 2:38 PM

NOTES:

Paperwork (for now):
in the meantime, I need each team to send a completed version of the attached "Michelin LPG Track Agreement 2023.docx" form by the end of September so that our site manager can approve you.

In terms of a track map, the existing plan is to have our subjective test drivers whip up something fun for your autocross course. We are using Track 8, which is a fairly coarse 400x1400 ft flat asphalt pad. Let us know if you have another course design preference. We do have 120v power at the conference center, but it would be wise to bring a backup charging method for EVs. We are hoping to facilitate tours as well.

General track safety rules:

- Absolutely no firearms, alcohol, or drugs onsite. Anyone found with any of these items will cause the event to immediately be shut down and all teams will have to leave.
- No hot work is permitted onsite. Please do not bring welding equipment.
- Jack stands and trailer stands need to have wood blocks underneath them.
- Spills should be avoided if possible. If a spill does occur, please have oil dry for clean up and let us know where it happened.
- No pets.
- Please clean up all trash at the end of each day as we have wildlife around.
- Up to 2 cars are allowed on track at the same time and must never be aimed towards each other.
- Drivers must have full fire suit, gloves, shoes, helmet, etc.
- A fire extinguisher must be held and ready whenever refueling occurs. The driver must be out of the vehicle.
- Anyone out on the course retrieving cones must have a high-visibility vest. We have some that can be provided by onsite security, but please bring your own if you have some.

ONLY 6 people w/ car (try to rotate)

Course workers:
Please let your attending team members know that we will need their help as flaggers, fire extinguisher/cone chaser duties, timing, scoring, set-up/clean-up crews etc.

Tech inspection:
We will be doing a little beyond basic function and safety checks. You need to have current fire suits, legal harnesses, a safe and structurally sound chassis, no leaks, functional kill switches, safely constructed battery accumulators, safe wiring, etc. We plan to do a quick brake check as well. If there is anything remotely questionable or unsafe about the car, you will be asked to make a change or not compete.

Discuss with the other teams if you would prefer to skip the event and exhaust restrictors. This is a closed course, so we primarily care that everyone competes safely, has a good time, and goes home in one piece.

TRACK:

Cars will be placed into groups 1 and 2 based on check-in time

Roster

Monday, October 2, 2023 8:44 PM

Projection from comp and using some of pitt times, should be 2nd in michelin only from IC

That being said theres no endurance which we didn't finish and didn't do super well in from EV, I think

3rd place is a good metric for our car

Subject: Kennesaw Motorsports - 2023 Season Recap

Email:

Good morning,

I hope this email finds you well. I wanted to take a moment to provide you with an exciting update on our motorsports team and share the tremendous success we achieved at the recent competition.

First and foremost, I am thrilled to announce that our team performed exceptionally well, securing a remarkable position in the overall standings. Out of 121 teams, our internal combustion vehicle placed 31st overall in May at the FSAE Michigan IC event. Out of 69 teams, our electric vehicle placed 6th overall in June at the FSAE Michigan EV event. This accomplishment is a testament to the unwavering dedication, hard work, and exceptional skills demonstrated by every member of our team.

Here are some key highlights from our performance:

IC:

- 3rd Place Cost
- 6th Place Acceleration
- 14th Place Skidpad
- 31st Overall

EV:

- 3rd Place Business
- 1st Place Cost
- 12th in Acceleration
- 14th in Skidpad
- 6th Place overall

We would like to extend our sincere gratitude to you and **INSERT COMPANY HERE** for your continuous support and belief in our team. It is through your partnership and support that we have been able to achieve such remarkable milestones.

Please see the attached selection of photos capturing the excitement and achievements of our team at the competition.

We would also like to extend an invitation to you and any of your colleagues who would find what we do interesting to a tour of our shop spaces on the KSU Marietta campus. If coming to us doesn't work well for you, we are willing and able to bring the cars to you. To set up a day and time, just express interest in a reply to this email and we can get something set up.

If you have any further questions or would like additional information, please do not hesitate to reach out. We are more than happy to provide any details you may require.

Thank you once again for your support, and we look forward to keeping you updated on our future endeavors.

Sincerely,

Steven.....

New Member Initiation Email

Dear *(Insert Member Name)*,

Congratulations on becoming a member of Kennesaw Motorsports! This means that you have completed all of the following:

- Completed a rules test with a passing grade of 70% or higher
- Completed a subgroup test to the satisfaction of a subgroup lead
- Paid team dues for incoming members (\$50)

This email serves as an official notice of your membership and will provide you with full access to team resources including Microsoft Teams, Owlife, and Discord.

Please make time to attend our next general meeting on Monday, October 10th. We will be going over pertinent information to your membership as well as walking you through the process to sign up through SAE. If you have a personal laptop, I highly encourage bringing it along.

Looking forward to working with you!

Comments/ concerns - all
 What to do w/out other EV teams other than Hytech
 What to do if ESP isn't passed yet?
 Ask what sections they are having issues with. If it's a major concern then no racing
 First year EV teams
 I don't think we should let first year EVs compete, this puts a very large risk on us.
 I think we should still invite them out if they want to experience other's teams and another
 teams ev active since we want people to succeed.
 EV teams a least need to show up a day early and do a EV tech/active
 Need to discuss if we are opening any Accs or not. : **No opening acc**
 Are we letting EVs charge ?
 If teams plan to charge need them to show that the charger is legal (tech sheet)
 Need to discuss if we are letting teams charge in car
 Need a charging area designated (they need to bring their own generator if they wanna
 charge
 After charging wait like 30 mins before running

Hi Teams!

This is Darek Panucci, Team President of Grizzlies Racing at Oakland University. I am very excited to announce that we will be hosting our first ever shootout style competition on campus the weekend of **June 29th**.

To start off, we are sending out an interest form to teams to gauge interest. I would encourage you all to fill out the form even if your team is not planning on coming.

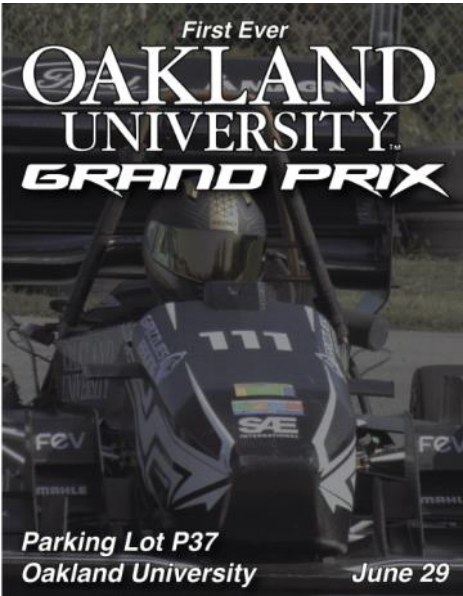

In the coming weeks, we will be sending out more information about the event, along with visuals so that everyone can see how the event will operate and give you all some ease of mind. We really want to put on a good event for everyone to attend, so feedback and advice is always welcome. We will be working with the organizer of Pitt Shootout to ensure the success of the event.

We plan on doing tech like at Pitt as well as we encourage teams to bring alumni cars to the event! If there are any questions or concerns, please let me know at this email or my personal one ccd in the email.

Attached are the link to the google form and the poster for the event.

All the best,
Darek Panucci
Grizzlies Racing President
